

MOHAN KUMAR K

+91 9345333084 | mohankumar172003@gmail.com

PROFESSIONAL SUMMARY

Computer Science graduate (M.E. pursuing) with hands-on experience in full-stack web development and machine learning. Delivered multiple end-to-end AI and full-stack projects using Python, FastAPI, React, LangGraph/LangChain, and PostgreSQL. Seeking a Software Developer Intern role to contribute strong problem-solving and engineering skills in a fast-paced team.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, FastAPI, LangGraph, LangChain, SQLAlchemy, Axios

Databases & Tools: PostgreSQL, Git, GitHub, VS Code, REST APIs, Postman, Swagger

EXPERIENCE

GenWorx.ai — Software Development Intern

Jul 2026 – Present

Full-Stack & AI Development Internship

- Contributing to the design and development of an AI-powered multi-agent document generation and review platform using LangGraph, LangChain, and Google Gemini, automating research, writing, and review workflows end-to-end.
- Building REST APIs with FastAPI and integrating them with a React frontend to support real-time workflow execution, document generation, and downloads.
- Designing a PostgreSQL database using SQLAlchemy to persist generated documents, reviewer feedback, and quality scores, with API contracts documented via Swagger.
- Developing a full-stack user authentication system with React and FastAPI, implementing secure registration, login, session management, and protected routing.
- Collaborating with cross-functional teams in an agile environment to deliver production-ready features, following best practices in API design, security, and testing.

PROJECTS

AI Multi-Agent Document Generation & Review System

Jul 2026 – Present

Python, FastAPI, React, LangGraph, LangChain, PostgreSQL, SQLAlchemy, Google Gemini

- Developed an AI-powered multi-agent application using LangGraph and LangChain with specialized Research, Writer, Reviewer, and Save agents to automate document generation.
- Implemented a conditional review workflow that evaluates document quality and automatically rewrites content until approval or a maximum of three iterations is reached.
- Built REST APIs using FastAPI and integrated them with a React frontend to enable document generation, real-time workflow execution, and document downloads.
- Designed a PostgreSQL database using SQLAlchemy to store generated Markdown documents, reviewer feedback, and quality scores.
- Engineered prompt-driven workflows, agent state management, and conditional routing to create an extensible architecture supporting future enhancements such as RAG, PDF/DOCX export, and streaming progress updates.

User Authentication System

Jul 2026 – Present

React, Vite, FastAPI, PostgreSQL, SQLAlchemy, Axios

- Developed a full-stack authentication application using React and FastAPI, implementing user registration, login, logout, and protected dashboard functionality.
- Designed and integrated a PostgreSQL database with SQLAlchemy ORM to securely manage user accounts and authentication data.
- Built modular RESTful APIs and connected the frontend using Axios for seamless client-server communication.
- Implemented password hashing, backend validation, CORS configuration, and client-side route protection to enhance application security.
- Tested and validated REST APIs using Postman, ensuring reliable authentication workflows and error handling.

EDUCATION

Easwari Engineering College — M.E. Computer Science Engineering | CGPA: 8.7/10

2025 – 2027 (Pursuing)

DMI College of Engineering — B.E. Computer Science Engineering | CGPA: 7.7/10

2020 – 2024

CERTIFICATIONS

- Udemy — Python Web Development (Django, SQL, REST APIs, HTML, CSS, JavaScript)
- Udemy — JavaScript
- Udemy — SQL
- DMI College — Full-Stack Web Development Workshop (Responsive Application Development)
